Support collection UA enriched dataset

- collect and review the data deliveries from the MS
- analyse what has been delivered
- the comparability between countries
- and to finally make a proposal for a more harmonised data collection in the future

Activities 2018-2021

- Production CLC2018
- Enrichment UA with Land use data
 - + European assessment of MS contributions
- National LU inventory (EAGLE LUA, LCH)
 - + European assessment of MS contributions

National Inventory Land Use Attributes and Land Characteristics

- National land use data as input for CLC+
- Inventory of national datasets
- Matching national data with EAGLE LUA/LCH needed to derive CLC+ instances
